Creatures & statistics

DELIBERATE RNG.
VISIBLE CONSEQUENCES.

A playable field system for Long Tar, Thorns, Stem and Rose: original encounters, exact chance readouts, bounded powers and practical GM records.

48 encounter profiles

25 training tracks

09 habitat tables

06 printable GM pages

REFERENCE FRAMEWORK

Fallout 1 / Cyberpunk 2020 / Night City / Shadowrun Third Edition. Their presentation and design patterns inform an original, consistent d20 system; the source games' statistics and cosmologies are not interchangeable.

Field Guide 1.0 - governed by Tabletop 1.0. New ecologies, numerical ratings and scenario details are tabletop adaptation. Includes exact fractional analytics and an offline, seeded encounter generator.

Read the stat. See the chance. Commit the cost. Record what changed.

How to use this field guide

A complete field-facing rules companion for one GM and one to six players. Use the four-page character sheet for continuing PCs, this book for uncertain actions and encounters, and the six-page encounter toolkit for session records. A d20, two d6 and two d10 are sufficient; a d12 is optional.

Pages	Use at the table
3-4	Reference framework and the different shapes of randomness
5-8	Make characters, read statistics and resolve a check
9-17	Exact odds, combat, survival, contracts, companions and materials
18-25	Budget encounters, generate habitats, build districts and define powers
26-30	Read the analytic models, compare all profiles and follow a worked scene
31-54	48 encounter profiles, two per page
55-59	Copyable creature, encounter, initiative, district and roll records
60-64	Ready situations, contrasting builds, source notes, index and quick reference

Three kinds of authority

Source lore is preserved as a fact, an attributed report or an open question. Tabletop 1.0 supplies the governing mechanics. T marks game adaptation: every numerical creature rating and the 24 new profiles are design choices, not author-supplied measurements. FOE01-24 retain prior numerical records; appended action caps, compact-NPC guard and presentation details are supplement clarifications.

The planning-cost overlay and encounter generator are optional additions. Agree to use them consistently. They do not change the base d20, starting budgets, damage formula, survival costs or companion limit. Long Tar Earth, the Fourth Corners and optional Spirit Rush campus scenes stay separate unless a crossover is explicitly agreed.

THE PURPOSE OF EXACT ANALYTICS

A probability can be exact for a declared model while the model remains an approximation of a whole encounter. The guide states the dice, assumptions, costs and limits beside each result. Mathematical verification is not human playtesting.

What the four references contribute

Reference / local PDF pages	Pattern used here	Translation into our system
Fallout 1 manual: 27-30, 53, 65-66, 79-91	Derived statistics, readable equipment, AP readouts, terrain-sensitive encounters, worked armor examples	Current/max vitals, visible costs, exact chance panels, distinct local and overworld scales
Cyberpunk 2020 core: 27-31, 34-40, 44-45, 100-103, 223-225	Roles, lifepath, stat + skill + die, declared modifiers and situational encounter tables	Roles guide six-rank training; voluntary background prompts feed dialogue; context is declared before rolling
Night City: 3-4, 41-42, 57-60, 76-78	Indexed districts, contacts, security separate from opponent capability	District records separate public knowledge, actual access, services, observation and encounter pressure
Shadowrun 3e: 39-41, 105-107, 263, 269, 271-275	Success-count dice pools, bounded action categories, contact scope and structured creature powers	Compare probability shapes; define every power by cost, range, target, duration, resistance and termination

One resolution language

Use d20 + one attribute + capped practice and relevant modifiers against a stated DC. A Cyberpunk difficulty of 20 and a Shadowrun target of 4 are not Rose DCs. Their scales, die rules and success meanings differ. The comparison on page 4 is explanatory, not a character conversion.

Keep the sources' useful organization while retaining this world's actual institutions and personal autonomy. A role does not issue a credential. Augmentation carries compatibility, condition and maintenance records; it does not automatically reduce personhood. A faction relationship never overrides a person's stated boundary.

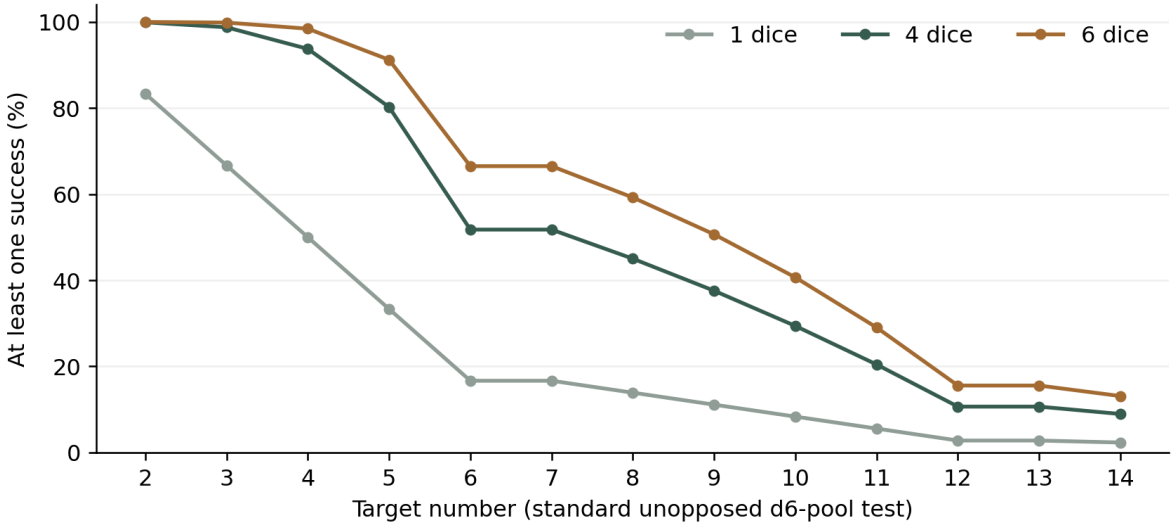

REFERENCE METHOD

The supplied scanned books were read locally with OCR and selected key pages checked visually. Only relevant sections were reviewed; no claim is made to have audited every page. Page numbers here are PDF page indices. No reference-book artwork or complete copyrighted manual is included in this kit.

Different dice create different decisions

Uniform dice and success-count pools

A plain d20 has twenty equally likely faces: 5% each. A +1 modifier usually changes success by five percentage points until the natural-1/natural-20 bounds intervene. A plain d10 has ten equally likely faces: 10% each before special rules. Cyberpunk 2020 adds a stat, a skill and 1d10; its natural 1 fails and its natural 10 calls for an additional d10 (PDF 44-45). Those special rules are not added to our d20.

Shadowrun 3e compares individual d6 results with a target, counts successes and uses repeated sixes to reach targets above six. It does not add the whole pool together. For independent dice, P(at least one success) = 1 - (1 - p)^n; P(at least k) is the binomial tail. These are standard unopposed tests only: no Karma, contested rolls or other special adjustments.

Target	One d6	At least one / 4 dice	At least one / 6 dice
4	50.00%	93.75%	98.44%
6	16.67%	51.77%	66.51%
7	16.67%	51.77%	66.51%
8	13.89%	45.02%	59.23%
10	8.33%	29.39%	40.67%
12	2.78%	10.66%	15.55%

A USEFUL DISCONTINUITY

A single die succeeds at target 6 and target 7 with the same probability, 1/6. At target 7 an initial six plus any second face reaches the target. Our d20 has no such target-number plateau. Do not copy numeric modifiers between systems.

Make a complete playable character

Choose name, pronouns, age description, origin, embodiment, affiliation and affinity. Record appearance, voice, mannerisms, formative event, livelihood, goal, unanswered question, personal boundary and one relationship. These details should appear in descriptions and NPC dialogue throughout the campaign; they are not automatic numeric bonuses.

Creation choice	Exact budget / starting value
Attributes	Body / Tech / Percept / Rapport: each 1-4; total exactly 8
Skills	Exactly 6 total ranks among 25 tracks; each rank 0-3
Vitals	Health 100; Energy 100; hunger, thirst, sleep debt 0
Conditions / progress	No injuries, ailments, XP, standing or universal credentials
Actual supplies	4 food, 5 water, 3 scrap, 2 seeds, 2 medkits
Equipment	Field staff, weather cloak, one appropriate role tool, one keepsake
Optional blueprint	Inactive until actually issued and installed
Load	Starting bulk 8; capacity 10 + 2 x Body

Roles as an aid, not a second class engine

A Needlurgist emphasizes Tech and interface craft; a NanoClad Scout emphasizes movement and fieldcraft; a Fractech Archivist reads and repairs records; a Seam Mediator develops voluntary agreements; a Metal-kin Artisan works material and pattern; a Light Reader studies manifestations. A role is a suggested build, never a locked dialogue option or a license.

Original lifepath prompt: choose or d6	Use in play
1 Maintained a shared fixture	Name its next responsible maintainer
2 Left an unfair obligation	Record an honest exit term, not a compulsory debt
3 Learned from a local teacher	Name a useful practice and an unresolved question
4 Survived a changed route	Keep one observed safe stop on the map
5 Preserved a disputed record	Distinguish a fact from a reported claim
6 Made a difficult promise	Name the person, scope and a viable return

These background seeds are T and voluntary. A player can change personal limits during play. Necra and Life Strings ranks permit study at creation; restricted practice, extraction and resurrection require their actual established scope.

Read attributes and derived statistics

Attribute	What it governs	Default applications
Body	Execution, resilience and movement	Transversal, fieldcraft, ballistics; AP and carrying
Tech	Craft and integration	Tools, interfaces, care, records and controlled apparatus
Percept	Observation and discrimination	Ecology, light, history, AETHER and remote observation
Rapport	Voluntary communication and agreement	Contracts, community, teaching and memetic interpretation

Derived field	Exact calculation
AP each own turn	8 + min(2, floor(Body / 2))
Initiative	Body + Percept + d6 - 1; fixed order for this encounter
Carry capacity	10 + 2 x Body bulk
Earned-XP bonus	min(2, floor(total earned XP / 3)); spending Growth does not lower it
Condition penalty	min(5, distinct injuries + ailments + needs at 70 or higher)
Fatigue penalty	2 if Energy <25, otherwise 0
Armor	Flat Health-damage reduction, maximum total 5
Staff / crystallin base	6 + Body / 9 + Body before wear and armor

Body	AP	Capacity	Staff base	Crystallin base
1	8	12	7	10
2	9	14	8	11
3	9	16	9	12
4	10	18	10	13

Compact opponents use a different representation

A bestiary Defense is a target DC for the PC's attack. Attack DC is the difficulty of the PC's Body/fieldcraft defense, not an enemy roll bonus. Armor is subtracted after a damaging hit. Fixed NPC initiative is already a score; do not add another d6 unless replacing that compact record with a full character build.

CURRENT STATE AND CAPACITY

Write Health and Energy as current/max when maintaining a full character. Profile Health is the encounter reserve for that instance, not a biological size measurement. An exposed feeler or service mechanism does not share its Health pool with a colossal whole.

All 25 training tracks

Use the default pairing unless the GM names a justified alternate approach before rolling. For example, the existing planting action explicitly uses Tech/druid. Use one skill, not the sum of several. Ranks are 0-3; practice still caps at +2.

Training track	Default	Use / scope
Transversal	Body	Movement through steep or compromised infrastructure.
Pilgrimage fieldcraft	Body	Practical route protection and expedition movement.
Wirelet / crystallin< ballistics	Body	Registered crystallin ranged field encounters
Needlurgy / bio-nano ink	Tech	Fine interface craft
seamLLurgy / seam control	Tech	Bounded seam-interface control, not an exemption from meta regulation.
Fractech / nodeTECH	Tech	Node integration and safe parameter handling.
Metallurgy / salvage	Tech	Repair, extraction and construction training.
Crystallin< / enneract craft	Tech	Crystalline apparatus and enneract-reference handling.
Resource acquisition	Tech	Provisioning knowledge
arcaneTECH / siphon_protocol	Tech	AETHER apparatus and energy-acquisition technique.
Archival / INTERnode analysis	Tech	Index analysis and narrative data comparison.
runeTECH / spark-core craft	Tech	Training with metal-kin patterns
medTech / extraction care	Tech	Field treatment proficiency
Necramancer / necra-mod theory	Tech	Study at creation; practice needs actual authority and apparatus.
Life Strings / Corded Bio-Glass	Tech	Study at creation; practice needs actual authority and apparatus.
Druid-Sec fractal ecology	Percept	Read ecological geometry without assuming faction immunity.
Percept / semblance discrimination	Percept	Distinguish representations from evidence.
lightPROKT< interpretation	Percept	Interpret light manifestations without treating them as property.
AETHER / fractURAL affinity study	Percept	Learn to read concentrations and LYLINE / LLYINE relationships.
NULL_FIELD remote survey	Percept	Remote observation only
Historical narrative analysis	Percept	Evaluate narrative fragments and context.
Contract mediation / Merc Tag literacy	Rapport	Negotiate within actual scope of a contract.
Community craft / provision	Rapport	Cooperative work and practical mutual assistance.
Teaching / integration dialogue	Rapport	Communicate an offer with room for refusal.
Memetic analysis / contract rhetoric	Rapport	Interpret institutional rhetoric

MASTERY IS QUALITATIVE

Rank 3 can reduce one complication in that skill by one step once per session. It cannot convert failure to success. Extra training still matters as a prerequisite and mastery even when practice has reached its die-bonus cap.

Memetic skill interprets or addresses rhetoric; it does not take over a mind. NULL_FIELD survey is remote observation, not a route through RED>GATE>. The listed crafting tracks do not remove tools, resources, consent or institutional scope.

The universal check, in full

TOTAL

d20 + attribute + practice + experience + situation + reputation + trust + attitude + support - conditions - fatigue

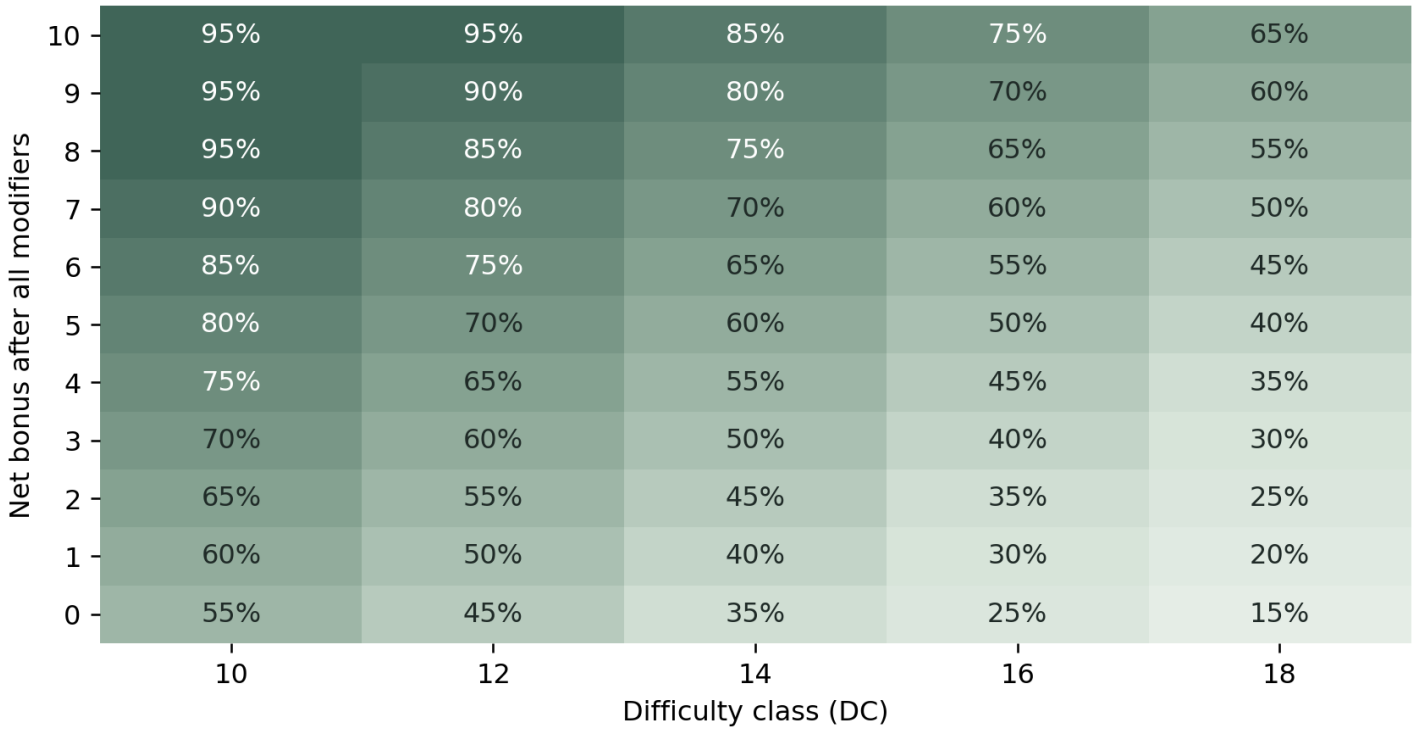

Term	Rule
Attribute	One of the four recorded attributes
Practice	min(2, relevant rank + 1 for one suitable functioning tool/mod that explicitly lists +1)
Experience	min(2, floor(total earned XP / 3))
Situation	Combine relevant factors, then clamp to -3..+3
Reputation	trunc((party standing + personal standing / 2) / 5), clamped -2..+2; truncate toward zero
Trust / attitude	With that NPC: +1 trust at 3-5; attitude +1 at 70+, -1 below 30, otherwise 0
Support	+1 per ready trained helper, maximum +2; spend their opportunity
Conditions / fatigue	Subtract positive counts: conditions max 5; fatigue 2 below Energy 25

DC	When to use it
No roll	Public facts, ordinary assured acts, a clear refusal, eligible guaranteed provision
10	Routine uncertainty
12	Risky
14	Hard
16	Severe
18	Extreme

First name intention, approach, target, DC, committed inputs, time and foreseeable consequence. Check physical possibility and authority before rolling. Natural 1 is a setback with the announced complication; natural 20 is strong on a permitted action. Otherwise meet DC for success; margin 5+ is strong. A failure by 1-4 is an ordinary setback; by 5+ adds one announced complication.

One result covers the exchange until circumstances change. Rephrasing a request does not farm trust or XP. Known facts, inventory and a confirmed route do not disappear on a failed interpretation. On a strong result choose one relevant benefit, never an extra copy of a contract reward.

Read your chance before committing

Each cell counts the die faces that succeed, including strong results. A bonus of +4 versus DC 12 succeeds on 8-20 except that the natural-1 rule remains in force: 13 of 20 faces, 65%. The ordinary die interval is broad enough that both planning and uncertainty matter.

EXACT SUCCESS SHORTCUT

For integer net bonus B and DC D: P(success) = clamp(1, 19, 21 + B - D) / 20. It ranges from 5% to 95% because natural 20 succeeds strongly and natural 1 fails. This assumes the attempted action was actually permitted.

Change to this example	Success chance	Difference
B +4, DC 12	65.00%	baseline
One additional legal +1	70.00%	+5 percentage points
Condition -1 and fatigue -2	50.00%	-15 percentage points
DC rises from 12 to 14	55.00%	-10 percentage points

A tool that does not explicitly list +1 grants no automatic bonus. At rank 2, a +1 tool still matters for access or capability but cannot exceed practice +2. Trust and attitude apply to the involved person, not to a wall or unrelated remote action.

Four outcomes, not just hit or miss

Complication	Setback	Success only	Strong
15.00%	20.00%	25.00%	40.00%

For +4 versus DC 12: rolls 1-3 complicate (15%); 4-7 are ordinary setbacks (20%); 8-12 are ordinary successes (25%); 13-20 are strong (40%). The total chance of success is 65%; strong is a subset, not an extra independent roll.

Outcome	Apply once	Example at the water line
Complication	The stated cost and one announced complication	The fitting is not installed; a named work clock advances
Setback	The stated attempt cost	The fitting remains uninstalled; no extra hidden injury
Success	The agreed result	The accessible shutoff works within the scoped task
Strong	The result and one relevant benefit	Also record a useful pressure observation; no duplicate payment

Why strong results are common

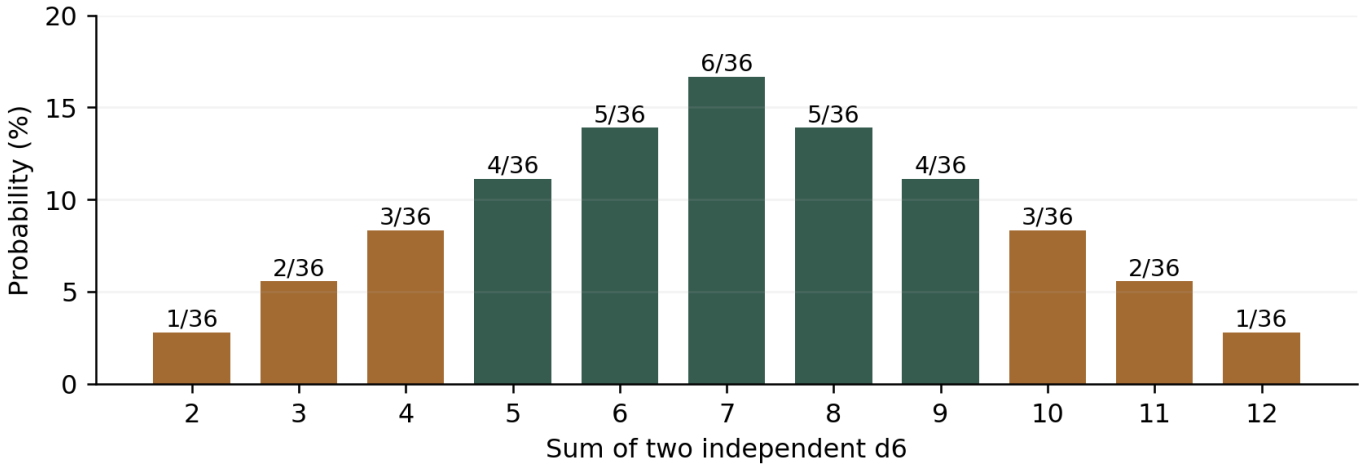

Our margin rule makes strong outcomes more common for a capable character on a modest DC. They are not Fallout's critical-hit table or Shadowrun's count of net successes. On an attack the default strong choice is +2 damage or a listed precision effect, not multiplying damage, ignoring armor and adding an injury together.

A natural-1 complication is already counted in the 15%. It is not rolled a second time. Natural 20 cannot breach an immutable boundary, invent an item, establish administrator status or affect a target whose anatomy or material makes the stated effect impossible.

A DEFENSE HAS ITS OWN MEANING

A strong player defense avoids the attack and can produce an agreed relevant benefit. It does not create an unlisted free counterattack. An enemy does not also roll to hit after the player has already rolled that defense.

Deliberate RNG and an honest roll ledger

Use random numbers where several plausible outcomes genuinely remain. Declare a table and its eligible context before rolling. Record die type, faces, result, table version and the accepted outcome. Change a table because the world changed, not because the GM disliked the last face.

Die / draw	Use	Exact convention
d20	Uncertain intention	One uniform face; natural 1 and 20 are special
d6	Weather, need or one of six equal prompts	Each face 1/6
2d6, added	Disposition and bounded profile variance	36 ordered equally likely pairs; totals are not uniform
d12	Weighted habitat tickets	Each face 1/12; optional substitute below
d100	Optional percentile display or custom table	Designate tens and units in advance; 00 is 100

No d12? Roll two d6: if the first is odd use the second (1-6); if even use 6 + the second (7-12). Each output has three of the 36 pairs, so the distribution is exactly uniform. Do not add the dice to simulate a d12.

Examples of forbidden statistical shortcuts: treating a 2d6 total as eleven equal outcomes; adding a second die after seeing a bad result; rerolling an over-budget profile until it becomes a desired opponent; counting companion help without spending their opportunity.

REPRODUCIBLE, NOT PREDETERMINED FICTION

The included offline generator records all faces and can replay a seed. A seed identifies a sample, not a canonical event. Preserve established identities and facts when the same location returns.

Turns, movement and visible action costs

Action	AP	Requirement / result
Move one clear local hex	1	Connected passable route; +1 for an ordinary elevation step
Stand / draw / reload / ordinary door	2	A needed check is included in this cost
Melee / parley / care / assist / interact	3	Use the stated skill and inputs
Ranged attack	4	Actual ammunition, range and line of sight
Guard	2	Body/fieldcraft DC 10: +2 defensive situation until next own turn
Disengage at a legal exit	1	Body/transversal DC 11; passable adjacent exit
End turn	0	No check; advance initiative
Target one exposed eligible part	+2	-1 situation; on strong choose one relevant injury instead of +2 damage

9 AP: MOVE 3 + TWO STAFF ATTEMPTS

1 1 1 / 3 AP / 3 AP

The baseline Body-2 character has 9 AP. Standing still allows three 3-AP staff attacks; moving three cells leaves two attacks. A 4-AP ranged mode permits two shots with 1 AP left. Unused AP expires; it does not automatically become armor. This differs from Fallout's reserve-AP behavior.

Roll initiative once: Body + Percept + d6 - 1. Ties use Percept, then Body, then the player side chooses its order; opposing ties use fixed clockwise token order. Each actor takes its own turn. Do not add extra enemy turns after every PC action.

SEAMLESS GROUND, PRECISE POSITIONS

Local hexes are optional hidden bookkeeping, roughly two meters in ordinary person-scale scenes. Describe paths, rooms, roots and cover, not floor-sized hexagons. Continental travel uses a destination or any reachable map point; no continent-wide meters-per-hex scale is asserted.

Combat, damage and control of effects

Melee uses Body/transversal against target Defense. Ranged uses Body/ballistics, a functioning issued mode, range and line of sight. To defend, roll Body/fieldcraft against enemy Attack DC; success avoids its listed attack, failure takes listed damage less armor. No second enemy attack roll is made.

PLAYER DAMAGE ORDER

floor(base damage x wear factor), then optional +2 on a strong result, then subtract armor; minimum 0. Wear is 1 at condition 60+, .8 at 30-59, .55 at 1-29 while the weapon remains operable. Use condition before the attempt, then spend wear.

Field mode	AP / range	Cost / operating threshold
Staff: 6 + Body	3 / adjacent	2 condition per attempt; threshold 1
Crystallin retrofit: 9 + Body	4 / 6 + LOS	1 actual prepared scrap charge per shot, including a miss; threshold 20
Ordinary integrated tool	Task cost	1 condition per time-consuming use
Other installed mods	Specific effect	Threshold 30; actual issue and compatible recipient required

Near or substantial cover adds +1 or +2 to target Defense for ranged attacks. For a PC defending, combine cover, guard and other situation factors once, cap +3. A fully opaque barrier prevents the shot. Armor DR caps at 5 and reduces Health damage, not an Energy-only pulse.

Temporary tags

Staggered loses 2 AP on the next own turn, minimum starting AP 2; duplicates do not stack. Visual disruption is -1 relevant visual situation until the next own turn. A bounded tether needs a real anchor: escape costs 3 AP, Body/transversal or Tech/metallurgy DC 12. A stun hit that brings Energy to 0 prevents acting/assisting until one unpressured own turn is spent recovering, then restores Energy 15. Ordinary exhaustion at Energy 0 applies fatigue without that stun flag.

Check morale once at the first qualifying trigger: half Health, protector lost or objective lost. Roll d20; above morale means follow its retreat/surrender priority. Natural 1 holds; natural 20 withdraws. The GM announces the priority. A person can voluntarily stop fighting sooner.

Compact NPC clarification (T)

Reduce a compact foe's Attack DC by its condition penalty and by 2 when Energy is below 25, minimum DC 6. For a specifically listed guard mode, spend 2 AP for +2 Defense until next own turn instead of another NPC roll; cover and guard combined cap at +3. PCs still roll their Guard check. Unlisted skill actions need a full NPC build. Attack DC is never an attribute or roll bonus.

Survival, care and earned progression

A cycle is an abstract interval, not a universal hour. Four form a watch. Charge only people spending it; advance the shared world once. Combat suspends survival cycles, then charges one to active participants at its conclusion. Keep Health, Energy and all needs in 0-100 after costs and recovery; benefits cannot overfill, and need reductions cannot become negative.

Action / interval	Pay first	Then resolve
Personal cycle	E -3; thirst +4; hunger +2; sleep +3	Clamp 0-100. Each need 90+ deals 4 HP; each ailment deals 1 HP
Eat or drink	1 cycle + 1 matching unit	Body/fieldcraft DC 8: need -45 on success, -35 on setback; E +8 either way
Sheltered breather	1 cycle	Body/fieldcraft DC 8: +35 E/+8 HP success, +25 E/+4 HP setback; sleep -10
Safe full rest	4 cycles + 1 food + 1 water	After costs: E 100, sleep 0, hunger/thirst -45, HP +25
Medkit	1 kit + 1 cycle, or 3 AP	Tech/medtech DC 10: +25 HP and remove one injury, else one ailment; strong +5 HP or one observation

Distinct named injuries and ailments count once each. Needs at 70+ add to the capped condition penalty; needs at 90+ also cause cycle damage. Ordinary fatigue is -2 below Energy 25. A functioning rest regulator changes the cycle sleep increase to +2.

At 0 Health, a character is incapacitated, not automatically permanently dead. Successful treatment can stabilize and heal. A plausible rescue takes at least two cycles and returns them to an agreed care contact at Health 40, Energy 40, needs 35, with injuries and obligations retained. Permanent-death rules are an explicit campaign option.

GROWTH, NOT GRINDING

Normally 1 XP per meaningful resolved situation; maximum 3 situation XP/session plus 1 for substantial goal progress. Contract XP replaces the ordinary award within that cap. Every 3 earned XP gives 1 Growth: spend 1 for skill +1 (max 3), or 2 for attribute +1 (max 4; total max 10 after creation). Peaceful resolutions count equally.

Contracts, reputation and generated dialogue

In the Fourth Corners, record provision, actual material and obligations rather than universal currency. Scrap is a material, not money. Contract ID, issuer, named holder, recipient, task, place, scope, inputs/escrow, evidence, deadline, reward, enforcement and exit term must be concrete before an uncertain acceptance check (Rapport/contracts DC 11).

Relevant standing	How to record / apply
Party and personal	Separate -20..+20 records with each faction; update only those that learn the event
Reputation modifier	trunc((party + personal/2)/5), clamp -2..+2; truncation is toward zero
Trust	0-5 with a particular NPC; +1 to relevant checks at 3+
Attitude	0-100; roll modifier +1 at 70+, -1 below 30, otherwise 0
Standing change	Typically +/-1 local deed, +/-2 meaningful contract; +/-5 only a major public event

A normal introductory packet is 2 food, 2 water, 1 seed, 2 XP, +2 party issuer standing and +2 personal issuer standing for participants, plus explicitly offered local care/service. Name the actual provider. Pay once per unique contract ID. A second volunteer does not create a second reward packet.

A dialogue procedure you can run without software

Combine an enduring fact + present need + reaction to the latest witnessed event + voluntary offer or refusal. Example: "The brace held last season. The line is lower now. You brought the agreed fitting; I can show the shutoff, but the archive is outside my scope." Then record speaker, listener, place, revealed fact, promise and any justified attitude change.

Public facts require no check. One successful exchange can add +1 trust at most once per four cycles, maximum 5. A statement of refusal remains a refusal. Contact scope, not only a high roll, determines whether someone can know or provide a thing. Preserve the difference between a rumor and an observed event.

Companions as autonomous participants

A human player may maintain one or two voluntary companion agreements. Normally at most two NPCs are active alongside the whole party in a scene. Each has a stable ID, own pack, full build, voice, past, goal, limits, personal standing, Health, Energy, attitude, trust and engagement record.

Procedure	Rule
Recruit	Willing present NPC, attitude 30+, HP 35+, E 15+, viable route. Offer actual 1 food/1 water; Rapport/community DC 11 if uncertain. Transfer on success only; +5 attitude; failure -1 attitude, no transfer. Wait 4 cycles/material change
Readiness	HP 35+, E 15+, attitude 30+, not Recover, issuer standing above -10, limits and actual scope met. Delivery needs its own cargo
Assist	Relevant rank 1+, same area, +1 support (max two helpers); consumes work opportunity and 2 E. In combat spend 3 AP for one check
Expedition upkeep	Each active cycle -1 E, or -2 if supporting. Every sixth consumes own 1 food/1 water; each missing unit costs another 3 E and 2 attitude
Guard	For 2 E, take up to 3 actual HP damage from one adjacent consenting ally once/round; no damage vanishes
Exit	Dismissal always ends the agreement; NPC keeps possessions and history. Attitude below 20 may lead to withdrawal

Engagement cycle

Every four shared cycles: Observe > Plan > Work > Reflect > Recover. Work uses real inputs, costs 4 extra Energy and cannot repeat within 12 cycles. Recovery gives +14 E/+4 HP in shelter or +6 E exposed. An NPC below readiness thresholds enters Recover immediately. Update focal NPCs; do not simulate a hidden adventure for every resident.

FROM PROFILE TO CONTINUING COMPANION

A compact encounter profile is not a complete recruitable build. If a willing eligible person becomes a companion, create their full legal attributes, six initial training ranks, actual history and pack; preserve current injuries and already-spent resources. Agree maximum/current Health explicitly; do not silently heal or duplicate their gear during that transition.

Material, equipment and bounded power

Material	Hardness	Max salvage fraction
Mineralized wood	2	.4
Worked metal	6	.6
Stone / earth composite	8	.5
Faceted crystal	4	.4
Woven fabric	1	.2
Bio-polymer	3	.4

Every significant item has an ID, holder, condition 0-100, operating threshold, material and embodied/recovered/lost scrap. A damaging hit to an exposed ordinary component loses max(0, incoming damage - hardness) condition. A monolith is a scale/integrity tag: work against an accessible local component or project, not a continent-sized Health bar.

At a watch end, significant exposed items lose 1 condition for ordinary dry use; wet/abrasive exposure adds 1; a declared severe storm adds 2. Protected packed items avoid ordinary exposure loss, but use wear still applies. Repair costs 1 actual scrap, 1 cycle, Tech/metallurgy DC 11; success restores 25 condition, cap 100. A ruined portable item needs a new replacement ID, 2 scrap and successful DC 11 work; archive the old ID.

A destroyed object has a total recovery budget floor(embodied scrap x material fraction). Transfer at most the remaining budget once; mark it cleared. Maintenance inputs are losses, not extra base salvage. A 7-scrap metal fixture yields at most 4 scrap, never 4 again after renaming it. Use one resolution track for an exposed target: bestiary Health or a component-condition ledger. Do not subtract the same hit from both as two separate harms.

Eight field-mod benefits

LEG|SPIKES: +1 suitable transversal practice. Meta-Fingers: +1 suitable fractech. Corded Bio-Glass: +1 suitable medtech. Survey lens: +1 suitable percept. Resonance link: +1 suitable contracts. All share practice +2 and need actual issue. Filter graft prevents the extra storm-irritation condition; rest regulator reduces cycle sleep increase; crystallin enables the specified issued ranged mode. At most three active benefits; this is not a limit on physical augmentation or identity.

CONSERVATION IS A GAME CONSTRAINT

A power source and actual charges must exist. A pulse, fuel use or shot spends a recorded input; it is not recovered as fresh energy on a later roll. Background VREX-TETHER bookkeeping stays off the player sheet. No particulate units are invented as scientific measurements.

Budget an encounter before rolling units

Human PCs	1	2	3	4	5	6
Normal budget	2	3	4	6	7	9
Easy: half, rounded up	1	2	2	3	4	5
Dangerous: 1.5x, rounded up	3	5	6	9	11	14

If two active NPCs take independent combat turns, add 1 to the normal base before applying easy/dangerous scaling. Merely offering assistance does not trigger that addition. Original nominal tiers are 1 minor, 2 specialist, 3 major; they remain printed beside every profile.

OPTIONAL PLANNING OVERLAY

Cost = max(nominal tier, ceil(expected staff attempts / 8), ceil(expected incoming damage per own turn / 8)). Baseline: PC attack and defense bonus +4, staff base 8 at condition 100, armor 2. These breakpoints are deliberately chosen pacing/pressure units, not a theorem of encounter fairness.

Expected attempts includes misses and overshoot against a fixed target. It assumes a constant sound weapon, no movement, no healing, no morale, no status or environmental disruption. Incoming pressure assumes legal attacks from a stationary target in range, capped by AP, per-turn limit and first-turn ammunition. Energy-only pressure is labeled separately; do not add it to Health as if they were the same pool.

Why add a second number? FOE18 Metal-kin apprentice remains nominal tier 1, but its 65 Health and armor 2 create more attrition than FOE01. FOE24 remains nominal tier 3 but is a much longer stationary staff target. Use the diagnostic tables to see those differences; do not secretly retune their numbers mid-fight.

Budgets are not promises that a fight is safe. Exits, sightlines, goals, supplies and current PC state matter. Prefer an easy opening session, visible telegraphs and a viable retreat. For low-attack parties, recompute using their actual bonus before adopting the planning overlay.

No compulsory fight

If a selected profile exceeds the available budget, show evidence, a distant observation, a blocked service or an alternate route rather than spawning an over-budget attacker. Record this transformation; do not reroll until a preferred enemy appears.

Run the controlled encounter generator

Order	Declare / roll	Effect
1	Setting + habitat + party + budget policy	Keep Long Tar, Thorns and optional Spirit Rush pools separate
2	Once per completed shared watch: d6	Quiet triggers on 1; exposed 1-2; disrupted 1-3
3	If triggered: d12 on habitat table	Choose the exact profile; duplicate tickets count
4	Budget gate	If base cost cannot fit, evidence only; stop actor generation
5	2d6 variant	2-4 depleted, 5-9 typical, 10-12 reinforced
6	d3 desired count (d6: 1-2 / 3-4 / 5-6)	Actual count = min(desired, floor(budget / final cost)); max 3
7	2d6 disposition + d6 present need	Motivation prompt, never compulsory hostility or consent
8	Record stable instance IDs and all faces	Carry surviving state into later visits; no reroll of identity

Declare quiet/exposed/disrupted from the actual route and changed conditions before the watch roll. The event chances are 1/6, 1/3 and 1/2. An event can be social, ecological, technical or an observation. No event is not permission to erase an already established problem.

The generator makes one profile group. It uses one shared variant and disposition roll to keep a pen-and-paper draw short. Its instances receive separate Health, condition, ammo and goals. Do not invent free additional pack members, triggered attacks or stock.

AN EXACT JOINT PROBABILITY

On an exposed Needle route, a watch event (1/3) selects FOE01 (4/12) and gets a defensive disposition (3/36) with probability 1/108, about 0.926%. This is a proposed defensive scene, not the probability of actual combat. The budget gate and any established boundary still apply.

Use the same procedure by hand or the offline Python generator. The recorded roll list is the authoritative replay; a seed is convenient within the supplied implementation. No internet, language-model service or account is required.

Habitats: cultivated ground and work routes

Needle cultivated margins

Thorns / Stem / Rose | table key: needle

d12	Profile	Tier / cost	Weight
1-4	FOE01 Misaligned salvage drone	1 / 1	1/3
5-7	FOE25 Ash-root grazer	1 / 1	1/4
8-9	FOE39 Provision steward	1 / 2	1/6
10	FOE32 Survey-lens beetle	1 / 1	1/12
11	FOE38 Disputed-allocation auditor	1 / 2	1/12
12	FOE40 Storm rescuer	1 / 2	1/12

Greatweb work routes

Thorns / Stem / Rose | table key: web

d12	Profile	Tier / cost	Weight
1-4	FOE02 Fractured reclamation construct	1 / 2	1/3
5-7	FOE34 Brace-hauler construct	2 / 3	1/4
8-9	FOE08 Pressured courier template	1 / 2	1/6
10	FOE03 Rogue route warden	2 / 2	1/12
11	FOE06 Overloaded transit frame	2 / 3	1/12
12	FOE07 Militia patrol template	2 / 3	1/12

AETHERGALE ledges / water

Thorns / Stem / Rose | table key: gale

d12	Profile	Tier / cost	Weight
1-4	FOE14 Aspen nesting pair	2 / 2	1/3
5-7	FOE29 Cold-current eel	2 / 2	1/4
8-9	FOE26 Prism-marsh wader	1 / 1	1/6
10	FOE28 Glass-wing pollinator	1 / 1	1/12
11	FOE17 LightPROKT visitor template	1 / 2	1/12
12	FOE33 Fault-lit watcher	2 / 2	1/12

All tickets are explicit; repeated IDs combine their weights. Select one group, not every row. If its base cost exceeds the budget, show signs instead. These are T encounter distributions, not canonical species censuses.

Habitats: shells, edges and archives

Snail Wood / Moonland approaches

Thorns / Stem / Rose | table key: shellwood

d12	Profile	Tier / cost	Weight
1-4	FOE16 Larval shell construct	1 / 1	1/3
5-7	FOE15 Arcane-mollusk exposed feeler	2 / 2	1/4
8-9	FOE27 Thorn-vine runner	1 / 2	1/6
10	FOE30 Root-channel keeper	2 / 3	1/12
11	FOE35 Canal shutter assembly	2 / 2	1/12
12	FOE05 Cache-lock sentinel	2 / 2	1/12

Permitted ArK edge / interfaces

Thorns / Stem / Rose | table key: ark

d12	Profile	Tier / cost	Weight
1-4	FOE13 Unstable EUNIX residue	2 / 2	1/3
5-7	FOE31 Ink-mote knot	1 / 1	1/4
8-9	FOE12 Exposed seam lobe	2 / 2	1/6
10	FOE04 Storm-stressed repair arm	1 / 2	1/12
11	FOE23 Damaged observation tripod	1 / 1	1/12
12	FOE24 Heavy reclamation assembly	3 / 6	1/12

ENACT_HILLS / archive approaches

Thorns / Stem / Rose | table key: enact

d12	Profile	Tier / cost	Weight
1-4	FOE18 Metal-kin apprentice template	1 / 2	1/3
5-7	FOE11 Counter-node decoy	1 / 1	1/4
8-9	FOE37 Archive interdictor	2 / 2	1/6
10	FOE36 Collapsed signal mast	2 / 2	1/12
11	FOE09 Contract saboteur template	2 / 2	1/12
12	FOE10 Frightened scavenger template	1 / 1	1/12

All tickets are explicit; repeated IDs combine their weights. Select one group, not every row. If its base cost exceeds the budget, show signs instead. These are T encounter distributions, not canonical species censuses.

Habitats: Earth margins and campus

Tar flats / salt shelves

Long Tar | table key: tar

d12	Profile	Tier / cost	Weight
1-4	FOE41 Brine-shelf skater	1 / 2	1/3
5-7	FOE20 Tar-flat stalker	2 / 2	1/4
8-9	FOE19 Yazashi traveler template	1 / 2	1/6
10	FOE42 Tar-mire burrower	2 / 2	1/12
11	FOE45 Longshadow pack leader	2 / 2	1/12
12	FOE43 Basalt-plated carrioner	3 / 3	1/12

Bunker service margins

Long Tar | table key: bunker

d12	Profile	Tier / cost	Weight
1-4	FOE21 Bunker service chassis	3 / 5	1/3
5-7	FOE44 Bunker pressure rig	3 / 4	1/4
8-9	FOE19 Yazashi traveler template	1 / 2	1/6
10	FOE41 Brine-shelf skater	1 / 2	1/12
11	FOE42 Tar-mire burrower	2 / 2	1/12
12	FOE43 Basalt-plated carrioner	3 / 3	1/12

Mundane campus scenes

Spirit Rush optional | table key: campus

d12	Profile	Tier / cost	Weight
1-4	FOE46 Campus dusk fox	1 / 1	1/3
5-7	FOE22 Campus security template	1 / 2	1/4
8-9	FOE47 Campus service cart	1 / 2	1/6
10	FOE48 Stage-lighting gantry	2 / 2	1/12
11	FOE22 Campus security template	1 / 2	1/12
12	FOE46 Campus dusk fox	1 / 1	1/12

All tickets are explicit; repeated IDs combine their weights. Select one group, not every row. If its base cost exceeds the budget, show signs instead. These are T encounter distributions, not canonical species censuses.

Bounded variation and disposition

2d6 total	Variant	Probability	Stat adjustment
2-4	Depleted	6/36 = 1/6	Health -5 (min 10), Defense -1, Attack DC -1, damage -1 (min 1); same cost
5-9	Typical	24/36 = 2/3	Preserve base record
10-12	Reinforced	6/36 = 1/6	Health +5, Defense +1, Attack DC +1, damage +1; cost at least base +1

For the planning overlay, reinforced cost is the greater of base cost +1 and the recomputed planning cost. If even one reinforced unit cannot fit the available budget, use the typical profile instead and record the fallback. The realized probabilities are then depleted 1/6, typical 5/6, reinforced 0, not the unadjusted table. Range, AP, armor, ammunition and permission never increase from this variant.

2d6	Disposition	Probability	Interpretation
2-3	Defensive	3/36	Protects the stated boundary; telegraph before aggression
4-5	Wary	7/36	Wants distance or proof before engaging
6-8	Occupied	16/36	Continues its goal unless circumstances change
9-10	Curious	7/36	Offers an opening for observation or dialogue
11-12	Helpful	3/36	A willing person offers within scope; an apparatus has a benign opening

A disposition is a prompt, not a command. An existing refusal, injured companion, safety interlock or inaccessible route takes precedence. Animals express need through movement and warning; a non-person hazard does not acquire human motives because a table says helpful.

Present need: equal d6 entries

1 clear return route; 2 real replacement part; 3 witnessed agreement; 4 shelter without added obligation; 5 intact observation record; 6 undisturbed habitat margin. Combine the result with the profile's enduring objective. If it does not fit established facts, use the nearest literal equivalent and write that interpretation; do not secretly change its weight.

Districts, contacts and useful public knowledge

Night City's indexed neighborhoods suggest a useful organization: a place can have services, a local culture, a security practice and an encounter profile without reducing all four to one danger score. For a new T location, write the following before rolling. A new district ID is not a claim that the source map supplied exact coordinates.

District field	Record something concrete
Place / connection	Stable ID, actual exits, crossings, known adjacent stops
Public life	Daily service, work rhythm, physical materials, light and sound
Provider / stock	Who maintains what; actual food, water, material and charge sources
Access	Public / scoped agreement / closed; issuer and authorized activity
Observation	What sensors or witnesses can actually see; how information travels
Pressure	Quiet / exposed / disrupted and the evidence that set it
Contacts	Stable person ID, knowledge domain, own goal, meeting place, availability
Change	A current work clock, habitat stress, degradation or repair result

Do not turn a security label into infinite guards or guaranteed knowledge. A local contact can know a route without knowing a private archive. Give known public facts directly; roll Percept/history for an inference, Rapport/community for a difficult introduction, or Rapport/contracts for disputed terms. New preparation can justify a new roll; repeated wording cannot.

ORIGINAL URBAN SEED

A service court has a working water station, an unstaffed repair bay and a closed archive entrance. Its steward can provide eligible water and public route information. They cannot grant the archive's separate scope. A courier's missing acceptance record creates a scene without creating a hostile faction.

To generate an urban situation, use the relevant habitat table, then attach a specific place and contact. Choose or roll a present need. Advance only the affected service and local witnesses. Reputation spreads by a named observation or report; it is not an instant global broadcast.

Build creature powers that can be adjudicated

Shadowrun's power entries explicitly name action, range, target and duration. Translate that clarity into the following T design form. The source's entire supernatural cosmology and its numeric Force ratings do not transfer to this world.

Power field	Required statement
Trigger / telegraph	What can the party observe before the effect?
Source / cost	Actual stored input, bodily effort or finite charge; AP and use limit
Eligible target	One observed reachable target or a precisely listed exception
Range / path	Local cells, contact or actual linked channel; solid barriers matter
Resistance	Which player defense/skill, exact DC and allowed preparation
Effect	Health OR Energy OR one bounded tag, not an unpriced bundle
Duration / stacking	Instant, until next own turn, or specified clock; duplicate tags do not stack
Termination	Disconnect input, leave range, break a real anchor or finish a project
Failure / aftermath	What remains, what was spent and who witnessed it

Example: an isolated ink-mote pulse

FOE31 telegraphs a lamp dimming at its powered coupling. It spends 4 AP and one of 3 stored pulses, targets one visible person within 3 cells, and asks for Body/fieldcraft versus Attack DC 12. Failed defense loses 8 Energy, not Health; armor does not reduce it. A reachable disconnected input prevents later pulses. No memory control, extra free attack or recovered power is implied.

Ecology is a cycle, not a loot list

Record feeding/working source, shelter, movement route, growth/recovery interval, reproduction status if established, pressure and a leaving condition. No universal toxicity, size, domestication or edible yield is inferred from an illustration. Aether_slime remains unfinished source material; this guide does not invent a completed canonical species for it.

A source monument, severe ArK whole, immutable boundary or unresolved cosmic protagonist is not forced into ordinary combat statistics. Rate an explicitly exposed local component, or run a scoped observation/repair project with a real exit.

Exact analytics: what the numbers mean

REFERENCE ADVENTURER

Body 2 / Tech 2 / Percept 2 / Rapport 2; transversal 2, fieldcraft 2, contracts 1, medtech 1. Legal creation: 8 attributes, 6 ranks. Attack +4, defense +4, staff base 8, AP 9, Health 100. Diagnostic armor 2 is an analysis assumption, not free starting gear.

For each die face compute the attack outcome, then the exact damage after wear and armor. Merge equal damage values into a probability mass function. Expected damage per attempt is the sum of damage x probability, including misses. Choosing +2 on every strong hit is an explicit analytic policy.

For a fixed target with h Health, let E(0)=0. If p0 is the chance of zero damage: E(h) = [1 + sum over d>0 of p(d) E(max(0,h-d))] / (1-p0). This first-passage recurrence counts misses and overshoot. It is not merely Health divided by mean damage. If p0=1, the expected attempts is unbounded.

P(clear in N attempts) is a finite exact distribution: start all mass at target h, apply the damage distribution N times and accumulate mass at zero. The six-attempt column uses N=6, roughly two stationary baseline turns; it does not include foe retaliation, movement or wear changes.

Target	Clear before staff breaks	Maximum attempts
FOE01 Misaligned salvage drone	100.000%	50
FOE21 Bunker service chassis	41.226%	50
FOE24 Heavy reclamation assembly	4.086%	50

The wear-aware check instead spends 2 weapon condition per attempt, updates damage at each wear band and ends when the staff is unusable. A new condition-100 staff permits 50 attempts before condition 0. It has no repair or replacement, morale, cover, moving target or healing. The exported fractions are exact for that limited model.

A USEFUL LIMIT

Incoming pressure is an expectation for one foe's stationary own turn. Do not multiply it by a guessed number of rounds and call that an exact win rate. Full combat depends on order, targeting, exits, current state and resource decisions.

Diagnostics: preserved profiles

Fixed snapshot: attack/defense +4, sound staff base 8, PC armor 2, +2 damage on every strong hit. Mean tries counts misses/overshoot. Clear6 is chance to remove the reserve in six attempts. Incoming is the first stationary own turn: Health unless marked E. Guard, cover, initiative, morale, movement and status are excluded.

ID	Profile	Mean tries	Clear6	Incoming	Tier/cost
FOE01	Misaligned salvage drone	6.19	64.0%	3.00	1/1
FOE02	Fractured reclamation construct	9.15	9.4%	6.40	1/2
FOE03	Rogue route warden	15.01	0.0%	9.00	2/2
FOE04	Storm-stressed repair arm	8.59	13.6%	7.20	1/2
FOE05	Cache-lock sentinel	15.61	0.0%	4.95	2/2
FOE06	Overloaded transit frame	21.09	0.0%	13.00	2/3
FOE07	Militia patrol template	16.07	0.0%	9.00	2/3
FOE08	Pressured courier template	8.14	24.8%	4.20	1/2
FOE09	Contract saboteur template	10.95	3.2%	7.20	2/2
FOE10	Frightened scavenger template	5.90	70.1%	3.00	1/1
FOE11	Counter-node decoy	7.00	50.0%	2.80 E	1/1
FOE12	Exposed seam lobe	11.36	1.0%	5.00	2/2
FOE13	Unstable EUNIX residue	9.34	14.5%	7.20	2/2
FOE14	Aspen nesting pair	11.62	3.3%	5.60	2/2
FOE15	Arcane-mollusk exposed feeler	11.89	0.0%	9.00	2/2
FOE16	Larval shell construct	6.34	59.9%	2.40	1/1
FOE17	LightPROKT visitor template	9.90	5.9%	3.50	1/2
FOE18	Metal-kin apprentice template	14.60	0.0%	6.40	1/2
FOE19	Yazashi traveler template	11.86	0.0%	5.60	1/2
FOE20	Tar-flat stalker	11.39	2.0%	9.00	2/2
FOE21	Bunker service chassis	35.04	0.0%	16.50	3/5
FOE22	Campus security template	8.14	24.8%	3.50	1/2
FOE23	Damaged observation tripod	5.35	82.7%	2.10	1/1
FOE24	Heavy reclamation assembly	44.34	0.0%	17.60	3/6

Planning cost is a chosen pacing/pressure overlay; a high cost is not a measured kill chance. The source nominal tier remains intact. Full exact fractions, expected damage and per-turn action counts are in the CSV/JSON package.

Diagnostics: new supplement profiles

Fixed snapshot: attack/defense +4, sound staff base 8, PC armor 2, +2 damage on every strong hit. Mean tries counts misses/overshoot. Clear6 is chance to remove the reserve in six attempts. Incoming is the first stationary own turn: Health unless marked E. Guard, cover, initiative, morale, movement and status are excluded.

ID	Profile	Mean tries	Clear6	Incoming	Tier/cost

Planning cost is a chosen pacing/pressure overlay; a high cost is not a measured kill chance. The source nominal tier remains intact. Full exact fractions, expected damage and per-turn action counts are in the CSV/JSON package.

Worked scene: a fitting and a warning

Three PCs approach a permitted Needle service court on an exposed watch. They use the optional planning overlay, normal budget 4. The roll ledger is deliberately shown instead of hidden behind narration.

Step	Recorded dice	Accepted result
Watch	d6 = 2	Event: exposed triggers on 1-2
Profile	d6 half = 1, d6 face = 1	d12 equivalent 1: FOE01 salvage drone
Variant	2d6 = 3 + 4 = 7	Typical: original stats
Count	d6 = 4 => desired 2	Two drones cost 2 of budget 4
Disposition	2d6 = 1 + 2 = 3	Defensive: protects its actual allocation
Present need	d6 = 3	A witnessed agreement

Each drone is its own instance: 30 Health, Defense 12, Attack DC 11, damage 7, armor 1, 6 AP, range 1. The party can show the real fitting record, compare the obsolete instruction or leave via the open route. Rapport/memetic DC 13 can offer transit; with net +4 this succeeds 60%, strong 35%. A successful conversation does not duplicate the fitting or reward.

If a declared conflict actually begins

Baseline initiative is Body 2 + Percept 2 + d6 - 1. A die 3 gives 6, ahead of the drones' fixed 4. Moving 3 cells costs 3 of 9 AP, leaving two staff attempts. First die 8: total 12, ordinary hit; damage 8 - armor 1 = 7. Target Health 30 -> 23; weapon condition 100 -> 98. Second die 13: total 17, strong; choose +2 damage: 8 + 2 - 1 = 9. Target 23 -> 14; condition 98 -> 96.

The drone has crossed half Health, so check its morale once. Die 16 exceeds morale 10: it follows its retreat/protect-load priority. No automatic retaliation happens between staff attempts. A different active drone acts on its own turn: two 3-AP attacks if adjacent. Against Attack DC 11 and baseline defense +4, failure chance is 30%; armor 2 makes each failed defense 5 Health damage. Its stationary expected pressure is 2 x .30 x 5 = 3 HP/turn.

BOOKKEEPING COMPLETES THE SCENE

Record each instance, actual material custody and the named witness. Resolve any contract once per unique ID, advance shared time once and charge the encounter's concluding cycle to active participants.

Calibration without pretending certainty

The package enumerates all twenty d20 faces for 300 bonus/DC pairs, verifies exact category mass, checks monotonicity and preserves every existing FOE01-24 numerical field. It also checks damage distributions across armor and wear and replays 2,160 generated encounters across party sizes and habitats.

Verification	Observed result
Exact d20 mass	300 bonus/DC rows; all 20 faces counted in each
Catalog integrity	24 prior records unchanged; 24 new profiles; every ID belongs to a valid world/habitat
Replay / budget	2,160 cases; identical recorded-face replay; no overspent actor budget
Sampler check	40,000 seeded baseline checks: 64.5425% observed vs 65% exact (sampling SE 0.238 percentage points)

A short human playtest protocol

Start with an easy budget, one clear objective and a visible exit. Log the actual builds, current Health/Energy, armor, tools, permissions, planning/nominal policy, profiles and all meaningful roll faces. Separate player decision time from mechanical resolution time.

After each scene record: turns until the objective changed, hostile actions actually taken, supplies spent, Health/Energy lost, conditions, retreat opportunity used, whether a nonviolent approach was available, and where the explanation was confusing. Compare observed attempts with the fixed-target diagnostic only for scenes close to that model.

Review several varied scenes before changing a rule. If armored minor profiles run long, reduce their encounter count or use a scoped objective before altering the die engine. If a threat is sharp but brief, telegraph it and ensure a reachable exit. Keep a change log, including which table or stat was changed and why.

WHAT HAS NOT BEEN ESTABLISHED

No human group has playtested this supplement during this task. There is no claimed full-combat win probability, source-faithful conversion of Cyberpunk/Shadowrun characters, exhaustive audit of the supplied books, or real-world physics/medical validity. The analytic scope is stated because it affects table decisions.

Encounter profiles FOE01 / FOE02

FOE01 Misaligned salvage drone

TIER 1 / COST 1

Thorns / Stem / Rose | preserved T profile

HEALTH	DEFENSE	ATTACK DC	DAMAGE	ARMOR	AP	REACH	MORALE
30	12	11	7 HP	1	6	1	10

Attack 3 AP | max 2/turn | init 4 | Energy 100 | actual input / bodily effort

Reference PC: hit 65.00% | strong 40.00% | mean damage 5.35/attempt

Recovery ceiling: 2 scrap; detached cleared non-person material only, once; no guaranteed stock.

Read / warning: A repeated warning chirp and fresh drag marks.

Objective: Guard its abandoned allocation.

Peaceful route: Tech/fractech DC 12 identifies a shutoff; Rapport/memetic DC 13 offers transit.

Action limit: Moves toward the nearest exposed tool; no attack after a PC action outside its own turn.

Aftermath: Record the actual witnessed result, spent stock and surviving obligation; this profile does not pay a second reward.

Source: T scenario design; no new canon identity, automatic credential or continent-scale coordinate.

FOE02 Fractured reclamation construct

TIER 1 / COST 2

Thorns / Stem / Rose | preserved T profile

HEALTH	DEFENSE	ATTACK DC	DAMAGE	ARMOR	AP	REACH	MORALE
40	12	13	10 HP	2	6	1	13

Attack 3 AP | max 2/turn | init 4 | Energy 100 | actual input / bodily effort

Reference PC: hit 65.00% | strong 40.00% | mean damage 4.70/attempt

Recovery ceiling: 2 scrap; detached cleared non-person material only, once; no guaranteed stock.

Read / warning: Its collector opens even when the pile is empty.

Objective: Recover a marked material pile.

Peaceful route: Return a verified tagged part or resolve its obsolete work order, Tech/archive DC 12.

Action limit: At half Health it prioritizes retreat with the pile over pursuit.

Aftermath: Record the actual witnessed result, spent stock and surviving obligation; this profile does not pay a second reward.

Source: T scenario design; no new canon identity, automatic credential or continent-scale coordinate.

Encounter profiles FOE03 / FOE04

FOE03 Rogue route warden

TIER 2 / COST 2

Thorns / Stem / Rose | preserved T profile

HEALTH	DEFENSE	ATTACK DC	DAMAGE	ARMOR	AP	REACH	MORALE
55	14	14	12 HP	2	6	1	15

Attack 3 AP | max 2/turn | init 5 | Energy 100 | actual input / bodily effort

Reference PC: hit 55.00% | strong 30.00% | mean damage 3.90/attempt

Recovery ceiling: 3 scrap; detached cleared non-person material only, once; no guaranteed stock.

Read / warning: A marker names an expired local scope.

Objective: Hold one obsolete route boundary.

Peaceful route: Rapport/contracts DC 13 with actual evidence narrows the boundary.

Action limit: Spends its first 2 AP guarding if nobody crosses; no blanket claim to real institutional authority.

Aftermath: Record the actual witnessed result, spent stock and surviving obligation; this profile does not pay a second reward.

Source: T scenario design; no new canon identity, automatic credential or continent-scale coordinate.

FOE04 Storm-stressed repair arm

TIER 1 / COST 2

Thorns / Stem / Rose | preserved T profile

HEALTH	DEFENSE	ATTACK DC	DAMAGE	ARMOR	AP	REACH	MORALE
35	11	13	11 HP	3	6	2	8

Attack 3 AP | max 2/turn | init 4 | Energy 100 | actual input / bodily effort

Reference PC: hit 70.00% | strong 45.00% | mean damage 4.40/attempt

Recovery ceiling: 2 scrap; detached cleared non-person material only, once; no guaranteed stock.

Read / warning: The arm returns to the same end stop.

Objective: Complete one dangerous repeated motion.

Peaceful route: Tech/metallurgy DC 12 isolates its real power feed.

Action limit: Stationary; range 2; a blocked line stops the motion from reaching a target.

Aftermath: Record the actual witnessed result, spent stock and surviving obligation; this profile does not pay a second reward.

Source: T scenario design; no new canon identity, automatic credential or continent-scale coordinate.

Attack 4 AP | max 1/turn | init 5 | Energy 100 | finite 3 uses

Reference PC: hit 55.00% | strong 30.00% | mean damage 5.00/attempt

Recovery ceiling: 0 scrap; detached cleared non-person material only, once; no guaranteed stock.

Read / warning: Black motes hang at a stained coupling, forming a trembling knot under a small lamp. The lamp dims at each pulse.

Objective: Remain attached to its actual powered coupling.

Peaceful route: Disconnect the reachable input with permission; Tech/needlurgy DC 11 isolates that coupling.

Action limit: Energy only; one 4-AP pulse per turn, range 3, 3 stored pulses. Armor does not reduce Energy loss.

Aftermath: The emptied coupling is evidence. Spent pulses are not recoverable power.

Source: T scenario design; no new canon identity, automatic credential or continent-scale coordinate.

FOE32 Survey-lens beetle

TIER 1 / COST 1

Thorns / Stem / Rose | new T profile

HEALTH	DEFENSE	ATTACK DC	DAMAGE	ARMOR	AP	REACH	MORALE
28	13	11	6 HP	2	6	1	6

Attack 3 AP | max 2/turn | init 5 | Energy 100 | actual input / bodily effort

Reference PC: hit 60.00% | strong 35.00% | mean damage 4.30/attempt

Recovery ceiling: 1 scrap; detached cleared non-person material only, once; no guaranteed stock.

Read / warning: A six-legged survey device carries a scuffed convex lens beneath a brass-colored hood. A dotted trail ends at a broken edge.

Objective: Finish a short marking path on its actual work surface.

Peaceful route: Present the actual survey marker or restore a safe surface; Tech/fractech DC 10.

Action limit: Its contact tool pinches; the lens grants neither a ranged attack nor remote credential access.

Aftermath: At most 1 scrap from a detached non-person casing after legitimate clearance.

Source: T scenario design; no new canon identity, automatic credential or continent-scale coordinate.

Encounter profiles FOE33 / FOE34

FOE33 Fault-lit watcher

TIER 2 / COST 2

Thorns / Stem / Rose | new T profile

HEALTH	DEFENSE	ATTACK DC	DAMAGE	ARMOR	AP	REACH	MORALE
50	15	14	11 HP	2	6	5	12

Attack 4 AP | max 1/turn | init 6 | Energy 100 | finite 4 uses

Reference PC: hit 50.00% | strong 25.00% | mean damage 3.50/attempt

Recovery ceiling: 2 scrap; detached cleared non-person material only, once; no guaranteed stock.

Read / warning: A ceramic body stands on angled supports; a shutter cycles from dull jade to warning amber. The shutter closes before a static click.

Objective: Keep visitors clear of one energized fault.

Peaceful route: Respect the marked distance or isolate the accessible fault; Tech/fractech DC 13.

Action limit: One 4-AP shot per turn, range 5, 4 actual charges; opaque cover stops the shot.

Aftermath: Repairing a warning boundary can end the encounter without destroying its watcher.

Source: T scenario design; no new canon identity, automatic credential or continent-scale coordinate.

FOE34 Brace-hauler construct

TIER 2 / COST 3

Thorns / Stem / Rose | new T profile

HEALTH	DEFENSE	ATTACK DC	DAMAGE	ARMOR	AP	REACH	MORALE
74	11	14	13 HP	4	6	1	10

Attack 3 AP | max 2/turn | init 4 | Energy 100 | actual input / bodily effort

Reference PC: hit 70.00% | strong 45.00% | mean damage 3.70/attempt

Recovery ceiling: 3 scrap; detached cleared non-person material only, once; no guaranteed stock.

Read / warning: A heavy shoulder frame carries a bracing jaw; load wear has polished its lower corners pale. The carried brace scrapes one side at each turn.

Objective: Deliver a named brace to a stable resting point.

Peaceful route: Clear a connected route or identify the delivery bay; Rapport/contracts DC 12 with the real order.

Action limit: Pays movement AP while loaded; an occupied narrow gap blocks it. No free trample.

Aftermath: Name the recipient. Clearing a route does not transfer the construct or its equipment.

Source: T scenario design; no new canon identity, automatic credential or continent-scale coordinate.

Encounter profiles FOE35 / FOE36

FOE35 Canal shutter assembly

TIER 2 / COST 2

Thorns / Stem / Rose | new T profile

HEALTH	DEFENSE	ATTACK DC	DAMAGE	ARMOR	AP	REACH	MORALE
60	10	13	12 HP	4	6	2	15

Attack 3 AP | max 1/turn | init 3 | Energy 100 | actual input / bodily effort

Reference PC: hit 75.00% | strong 50.00% | mean damage 4.00/attempt

Recovery ceiling: 2 scrap; detached cleared non-person material only, once; no guaranteed stock.

Read / warning: Layered shutter leaves fold inside a stone channel; wet seams mark previous stopping positions. A retaining leaf knocks twice before moving.

Objective: Maintain the established local water level.

Peaceful route: Use the raised crossing or brace a leaf; Tech/metallurgy DC 12 with the load supported.

Action limit: Immobile; one 3-AP closure per turn, reach 2. A real shutoff prevents further attacks.

Aftermath: The shutter is one component. Its Health is not the canal or monument integrity.

Source: T scenario design; no new canon identity, automatic credential or continent-scale coordinate.

FOE36 Collapsed signal mast

TIER 2 / COST 2

Thorns / Stem / Rose | new T profile

HEALTH	DEFENSE	ATTACK DC	DAMAGE	ARMOR	AP	REACH	MORALE
40	10	14	11 HP	2	6	3	8

Attack 4 AP | max 1/turn | init 2 | Energy 100 | finite 6 uses

Reference PC: hit 75.00% | strong 50.00% | mean damage 5.50/attempt

Recovery ceiling: 2 scrap; detached cleared non-person material only, once; no guaranteed stock.

Read / warning: A broken mast hangs above a path from a frayed strap and a taut lead. A blue-white reflection reaches the strap before a pulse.

Objective: Cycle until the actual input stops.

Peaceful route: Leave its swing path and isolate the input; Tech/metallurgy DC 12.

Action limit: Immobile; one 4-AP pulse per turn, range 3, 6 stored charges. Solid cover blocks it.

Aftermath: An isolated cleared non-person housing yields at most 2 scrap, once.

Source: T scenario design; no new canon identity, automatic credential or continent-scale coordinate.

Encounter profiles FOE37 / FOE38

FOE37 Archive interdictor

TIER 2 / COST 2

Thorns / Stem / Rose | new T profile

HEALTH	DEFENSE	ATTACK DC	DAMAGE	ARMOR	AP	REACH	MORALE
52	14	15	12 E	1	6	4	13

Attack 4 AP | max 1/turn | init 6 | Energy 100 | finite 4 uses

Reference PC: hit 55.00% | strong 30.00% | mean damage 4.45/attempt

Recovery ceiling: 1 scrap; detached cleared non-person material only, once; no guaranteed stock.

Read / warning: Mirrored indexing plates rotate around a small core, each displaying a different timestamp. The same answer returns with an earlier time.

Objective: Hold a local query channel open.

Peaceful route: Close the actual connection and preserve an offline record; Tech/archive DC 13 with access.

Action limit: Energy only; one 4-AP pulse per turn, range 4, 4 charges. No rewriting private memories.

Aftermath: The discrepancy supports a bounded inquiry, not a claim about every archive intelligence.

Source: T scenario design; no new canon identity, automatic credential or continent-scale coordinate.

FOE38 Disputed-allocation auditor

TIER 1 / COST 2

Thorns / Stem / Rose | new T profile

HEALTH	DEFENSE	ATTACK DC	DAMAGE	ARMOR	AP	REACH	MORALE
55	13	12	7 HP	1	8	1	10

Attack 3 AP | max 2/turn | init 5 | Energy 100 | actual input / bodily effort

Reference PC: hit 60.00% | strong 35.00% | mean damage 4.90/attempt

Recovery ceiling: 0 scrap; detached cleared non-person material only, once; no guaranteed stock.

Read / warning: An inspection coat shelters two inconsistent copies of a service allocation. Asks for the issuer before inspecting gear.

Objective: Establish which holder may use one limited stock.

Peaceful route: Compare the actual terms; Rapport/contracts DC 12 for a genuinely disputed reading.

Action limit: Person template, not automatic institutional authority. A witnessed review can end the dispute.

Aftermath: Record a scoped agreement and exit term; the coat grants no universal credential.

Source: T scenario design; no new canon identity, automatic credential or continent-scale coordinate.

Encounter profiles FOE39 / FOE40

FOE39 Provision steward

TIER 1 / COST 2

Thorns / Stem / Rose | new T profile

HEALTH	DEFENSE	ATTACK DC	DAMAGE	ARMOR	AP	REACH	MORALE
50	12	11	6 HP	1	8	1	10

Attack 3 AP | max 2/turn | init 4 | Energy 100 | actual input / bodily effort

Reference PC: hit 65.00% | strong 40.00% | mean damage 5.35/attempt

Recovery ceiling: 0 scrap; detached cleared non-person material only, once; no guaranteed stock.

Read / warning: Patched sleeves, labeled packs and a maintained water seal identify a careful local worker. Counts units aloud before handover.

Objective: Meet a declared provision commitment without creating an unbounded demand.

Peaceful route: State the need and actual eligibility; Rapport/community DC 10 for an uncertain request.

Action limit: Person template. Stock is finite; a failed greeting never cancels a guaranteed eligible service.

Aftermath: Their private pack remains private. An honest ledger can prevent the next shortage.

Source: T scenario design; no new canon identity, automatic credential or continent-scale coordinate.

FOE40 Storm rescuer

TIER 1 / COST 2

Thorns / Stem / Rose | new T profile

HEALTH	DEFENSE	ATTACK DC	DAMAGE	ARMOR	AP	REACH	MORALE
65	13	13	9 HP	2	8	1	13

Attack 3 AP | max 2/turn | init 6 | Energy 100 | actual input / bodily effort

Reference PC: hit 60.00% | strong 35.00% | mean damage 4.30/attempt

Recovery ceiling: 0 scrap; detached cleared non-person material only, once; no guaranteed stock.

Read / warning: A broad rain hood shelters bright repair ties and an inspected folded sling. Checks the return route before offering help.

Objective: Reach a named person before a route becomes unsafe.

Peaceful route: Offer a clear path and specific task; Rapport/community DC 11 to coordinate under pressure.

Action limit: Person template; rescue or care uses its opportunity instead of also attacking. Real supplies required.

Aftermath: Record the rescued person, supplies actually spent and the viable return route.

Source: T scenario design; no new canon identity, automatic credential or continent-scale coordinate.

Encounter profiles FOE41 / FOE42

FOE41 Brine-shelf skater

TIER 1 / COST 2

Long Tar | new T profile

HEALTH	DEFENSE	ATTACK DC	DAMAGE	ARMOR	AP	REACH	MORALE
36	14	12	8 HP	1	8	1	7

Attack 3 AP | max 2/turn | init 6 | Energy 100 | actual input / bodily effort

Reference PC: hit 55.00% | strong 30.00% | mean damage 4.45/attempt

Recovery ceiling: 0 scrap; detached cleared non-person material only, once; no guaranteed stock.

Read / warning: A pale low body slides over salt crust on wide feet; the underside leaves a clean narrow wake. Salt flakes flip in a line ahead of the body.

Objective: Cross a drying shelf before its surface fails.

Peaceful route: Wait at a stable bank; Body/fieldcraft DC 11 evaluates an uncertain shortcut.

Action limit: Its presence does not guarantee safe footing. Only established connected routes support movement.

Aftermath: The fading wake is surface evidence, not a universal map of the flats.

Source: T scenario design; no new canon identity, automatic credential or continent-scale coordinate.

FOE42 Tar-mire burrower

TIER 2 / COST 2

Long Tar | new T profile

HEALTH	DEFENSE	ATTACK DC	DAMAGE	ARMOR	AP	REACH	MORALE
62	12	14	13 HP	2	6	1	10

Attack 3 AP | max 2/turn | init 4 | Energy 100 | actual input / bodily effort

Reference PC: hit 65.00% | strong 40.00% | mean damage 4.70/attempt

Recovery ceiling: 0 scrap; detached cleared non-person material only, once; no guaranteed stock.

Read / warning: A tar-dark ridge covers pale jointed flanks; breathing opens a brief dry ring in the mire. The mire settles into a ring before the ridge rises.

Objective: Keep a cool cavity and an escape opening.

Peaceful route: Give the cavity room; Percept/druid DC 12 identifies its breathing margin.

Action limit: Burrowing still costs connected movement AP; no attack from an unobserved location.

Aftermath: Confirm a changed route using evidence. A failed roll cannot erase a known road.

Source: T scenario design; no new canon identity, automatic credential or continent-scale coordinate.

Encounter profiles FOE43 / FOE44

FOE43 Basalt-plated carrioner

TIER 3 / COST 3

Long Tar | new T profile

HEALTH	DEFENSE	ATTACK DC	DAMAGE	ARMOR	AP	REACH	MORALE
78	12	15	14 HP	4	6	1	12

Attack 3 AP | max 2/turn | init 4 | Energy 100 | actual input / bodily effort

Reference PC: hit 65.00% | strong 40.00% | mean damage 3.40/attempt

Recovery ceiling: 0 scrap; detached cleared non-person material only, once; no guaranteed stock.

Read / warning: Dark overlapping plates make a stooped body look geological; soft joints show during a turn. A rasp continues after loose debris stops.

Objective: Feed at a dead organic deposit without being cornered.

Peaceful route: Leave the deposit and take the exit; Percept/fieldcraft DC 12 assesses an uncertain route.

Action limit: Deliberate melee; no area strike or armor immunity. Withdraws when its feeding objective is lost.

Aftermath: Remains require an actual usable source and treatment before counting as food.

Source: T scenario design; no new canon identity, automatic credential or continent-scale coordinate.

FOE44 Bunker pressure rig

TIER 3 / COST 4

Long Tar | new T profile

HEALTH	DEFENSE	ATTACK DC	DAMAGE	ARMOR	AP	REACH	MORALE
90	11	15	16 HP	4	6	2	15

Attack 3 AP | max 1/turn | init 3 | Energy 100 | finite 3 uses

Reference PC: hit 70.00% | strong 45.00% | mean damage 3.70/attempt

Recovery ceiling: 3 scrap; detached cleared non-person material only, once; no guaranteed stock.

Read / warning: A squat pressure frame braces against a sealed sleeve, condensation gathering beneath its head. Measured venting precedes the short ram stroke.

Objective: Keep one local compartment within its operating range.

Peaceful route: Use a genuine service interface and pressure release; Tech/fractech DC 14 with scope.

Action limit: Immobile; one 3-AP ram per turn, reach 2, 3 stored strokes. The bunker is not its Health bar.

Aftermath: A legitimately cleared non-person frame yields at most 3 scrap once.

Source: T scenario design; no new canon identity, automatic credential or continent-scale coordinate.

Encounter profiles FOE45 / FOE46

FOE45 Longshadow pack leader

TIER 2 / COST 2

Long Tar | new T profile

HEALTH	DEFENSE	ATTACK DC	DAMAGE	ARMOR	AP	REACH	MORALE
56	15	14	12 HP	1	8	1	11

Attack 3 AP | max 2/turn | init 6 | Energy 100 | actual input / bodily effort

Reference PC: hit 50.00% | strong 25.00% | mean damage 4.00/attempt

Recovery ceiling: 0 scrap; detached cleared non-person material only, once; no guaranteed stock.

Read / warning: A lean high-backed hunter carries a long spine stripe visible in broken evening light. One call comes from cover as a second track turns away.

Objective: Keep its group together and abandon costly prey.

Peaceful route: Keep the party together and a retreat open; Percept/fieldcraft DC 12 reads the approach.

Action limit: This token is the leader only; other animals need separately budgeted tokens. No off-turn pack strikes.

Aftermath: New creature, not the Wuturan brand character or an asserted canon population.

Source: New Long Tar creature; no canonical Wuturan identification.

FOE46 Campus dusk fox

TIER 1 / COST 1

Spirit Rush optional | new T profile

HEALTH	DEFENSE	ATTACK DC	DAMAGE	ARMOR	AP	REACH	MORALE
24	14	10	4 HP	0	8	1	4

Attack 3 AP | max 2/turn | init 6 | Energy 100 | actual input / bodily effort

Reference PC: hit 55.00% | strong 30.00% | mean damage 5.00/attempt

Recovery ceiling: 0 scrap; detached cleared non-person material only, once; no guaranteed stock.

Read / warning: A dusk-colored fox carries wet leaf fragments and prefers cover to people. Soft steps pause behind a campus bench.

Objective: Reach a quiet planted margin.

Peaceful route: Leave room to retreat, no roll. Percept/druid DC 10 only for an extra ecological inference.

Action limit: Optional mundane Spirit Rush scene; no supernatural capacity is implied.

Aftermath: The observation adds atmosphere without a forced crossover or fight.

Source: Optional mundane campus animal; not a manuscript event.

Encounter profiles FOE47 / FOE48

FOE47 Campus service cart

TIER 1 / COST 2

Spirit Rush optional | new T profile

HEALTH	DEFENSE	ATTACK DC	DAMAGE	ARMOR	AP	REACH	MORALE
42	10	11	8 HP	3	6	1	5

Attack 3 AP | max 1/turn | init 3 | Energy 100 | actual input / bodily effort

Reference PC: hit 75.00% | strong 50.00% | mean damage 4.75/attempt

Recovery ceiling: 1 scrap; detached cleared non-person material only, once; no guaranteed stock.

Read / warning: A maintenance cart veers on one sticking wheel, carrying already inventoried supplies. The stuck wheel clicks before the cart veers.

Objective: Stop at its designated loading point.

Peaceful route: Clear the slope or engage the brake; Tech/metallurgy DC 10 under real time pressure.

Action limit: Non-person apparatus; one 3-AP collision per turn. Its actual cargo is a separate stock.

Aftermath: Return the cart and stock. At most 1 scrap from legitimately cleared casing.

Source: Optional campus apparatus; not a manuscript event.

FOE48 Stage-lighting gantry

TIER 2 / COST 2

Spirit Rush optional | new T profile

HEALTH	DEFENSE	ATTACK DC	DAMAGE	ARMOR	AP	REACH	MORALE
48	10	13	12 HP	2	6	3	5

Attack 4 AP | max 1/turn | init 2 | Energy 100 | finite 1 uses

Reference PC: hit 75.00% | strong 50.00% | mean damage 5.50/attempt

Recovery ceiling: 2 scrap; detached cleared non-person material only, once; no guaranteed stock.

Read / warning: A lighting frame hangs from a failed stage brace; dust marks its narrowing swing. A bracket creaks before the lowest lamp tilts.

Objective: Physical hazard: release the stored load along its declared path.

Peaceful route: Leave the marked path or support the load; Tech/metallurgy DC 12 with a real brace.

Action limit: Immobile; one 3-AP fall in the entire scene, then inert. No repeated collapse or reload.

Aftermath: Optional campus staging; at most 2 scrap after safe authorized clearance.

Source: Optional campus hazard; not a manuscript event.

Creature design record

Six ready situations

Situation / profile	Opening, goal and a viable alternative
1 Needle / FOE01	A warning chirp interrupts a fitting handover. Show a real allocation or compare the obsolete order. Actual cargo is one recorded fitting; the public path remains a retreat.
2 Greatweb / FOE34	A brace-hauler cannot turn through an occupied narrow service gap. Clear a route or identify the correct delivery bay. No need to defeat its armored frame.
3 AETHERGALE / FOE14	A nesting pair circles a ledge before the route bends. Give the nest space or assess the safe margin. One token is the pair, not two full-health enemies.
4 Shell approach / FOE35	A shutter knocks before closing across a reachable path. A raised crossing exists; supporting the real leaf can halt the hazard. The surrounding canal remains a monolith.
5 Long Tar / FOE44	A pressure rig protects a local service sleeve. Its three strokes are finite. A genuine service record and safe pressure release can resolve the scene.
6 Campus / FOE48	A stage bracket creaks over an empty path. Step out or brace the accessible load. This optional mundane scene is not a confirmed manuscript event or forced crossover.

Scale to the party

Check each selected profile against the chosen budget policy before placing an actor. If it cannot fit, present its signs or a bounded observation instead. Do not place two FOE14 pair tokens because the name contains pair, or add free animals to a pack-leader token.

A meaningful peaceful solution earns the same situation XP as fighting. Services and contract rewards come from actual providers and are paid once. All six situations are T campaign possibilities, not events claimed to have happened in the authored story.

Three legal builds with different approaches

Nera Vell / Needlurgist

An ANC.NI apprentice who keeps a careful record of consent and every changed interface. Nera wants a supervised field practice that can survive an honest audit.

Attributes	Training	Derived
Body 1, Tech 4, Percept 2, Rapport 1	needlurgy 2; seamllurgy 1; crystallin 1; metallurgy 1; contracts 1	AP 8; capacity 12; staff base 7

Goal: Recover the issuer of a misfiled maintenance promise. Boundary: Ask before describing someone else's internal systems.

Ash Reed / NanoClad Scout

A route scout who learned to report a dangerous crossing without promising anyone an impossible safe passage. Ash wants to reopen a known route with a real return plan.

Attributes	Training	Derived
Body 4, Tech 1, Percept 2, Rapport 1	transversal 2; fieldcraft 2; aether 1; nullsurvey 1	AP 10; capacity 18; staff base 10

Goal: Bring back a useful observation rather than a heroic rumor. Boundary: No one is left without being told the exit.

Ilan Cusp / Seam Mediator

A resident liaison who can explain a contract in plain language but cannot certify it alone. Ilan wants an agreement in which every worker understands the exit term.

Attributes	Training	Derived
Body 1, Tech 2, Percept 1, Rapport 4	contracts 2; teaching 2; community 1; memetic 1	AP 8; capacity 12; staff base 7

Goal: Make an issuer accept responsibility for an omitted provision. Boundary: A refusal remains a refusal.

Each build uses the same creation budget, starting supplies and inactive blueprint rule. The role is a play style, not a license. Allocate a suitable role tool where it actually lists +1, capped by practice. A scholar's low untrained melee bonus is a deliberate reason to investigate, negotiate and seek trained help.

THE DIAGNOSTIC BASELINE IS SEPARATE

The Body-2 reference adventurer on page 26 exists to make probability comparisons reproducible. Diagnostic armor 2 is a scenario assumption and is not added to any of these starting characters.

Source notes and edition boundaries

Governing source: Long Tar / Thorns / Spirit Rush Game Master Kit, Tabletop 1.0, numerical register, core rules and Long-Tar-Lore-Register.json. The existing four-page Thorns / Stem / Rose Character Sheet uses that same core. FOE01-24 preserve all original numerical fields; FOE25-48 are new T profiles.

Supplied reference	Selected local reading / OCR ranges and purpose
Fallout 1 Vault Dweller's Survival Guide	Prior local review: PDF 23-34, 53, 65-66, 79-91, 99-100; inspected 27/53/81/88 for layout. Derived fields, AP, probabilities, armor sequence and encounter context.
Cyberpunk: The Roleplaying Game of the Dark Future (2020)	PDF 3-7, 27-31, 34-40, 42-46, 99-103, 222-225 via local OCR; visually checked 44. Roles, background, base skill check, exceptions and contextual encounter tables.
Night City sourcebook	PDF 3-6, 40-43, 57-60, 76-78 via local OCR; visually checked 41. The supplied filename is Spanish but the scanned body pages reviewed are English. District indexing and distinct security/opponent fields.
Shadowrun Third Edition, corrected eighth printing	PDF 3-6, 37-41, 104-107, 113-115, 257-261, 263-275 via local OCR; visually checked 39/271. Standard dice tests, contact scope, NPC behavior and explicit power fields.

PDF indices can differ from printed folios because of covers and image inserts. Some prepared pages served only navigation/context or are divider art with no OCR text. Key mechanics and indicated layouts received focused review. This is not an exhaustive reading or a reprint of any reference rulebook.

The kit includes our editable prose, original data, exact fractional results, analytic/generator scripts, core rules and source audit. It excludes the supplied copyrighted scans and their extracted full text/artwork. All drawings and charts in the guide are original analytical visualizations.

KNOWN LIMITS

Planning costs are a conservative chosen metric, not measured difficulty. Encounter forecasts depend on stationary fixed-target assumptions. New ecologies, appearances, lifepaths and district seeds remain proposed tabletop content. Human testing is the next calibration step.

FOE23 / 42	Damaged observation tripod	FOE47 / 54	Campus service cart
FOE24 / 42	Heavy reclamation assembly	FOE48 / 54	Stage-lighting gantry

Habitat keys and full source/provenance records are in the data package. Each FOE ID is a template; each actual encountered individual also needs its own stable instance ID.

GM quick reference

ONE ROLL

d20 + attribute + practice + experience + situation + reputation + trust + attitude + support - conditions - fatigue. Check possibility, scope, consent, tools and committed costs first.

Check / caps	Rule
Practice / XP	min(2, rank + one explicit +1 tool) / min(2, floor(earned XP/3))
Situation / support	-3..+3 combined / +1 ready trained helper, max +2
Reputation	trunc((party + personal/2)/5), clamp -2..+2
Trust / attitude	+1 at trust 3+ with NPC; attitude +1 at 70+, -1 below 30
Conditions / fatigue	min(5, injuries + ailments + needs 70+) / 2 below E 25
Outcomes	Nat 1 complication; nat 20 strong; meet DC success; margin 5+ strong
DCs	10 routine / 12 risky / 14 hard / 16 severe / 18 extreme

Tactical field	Rule
AP / initiative	8 + min(2, floor(Body/2)) / Body + Percept + d6 - 1
Actions	Move 1; draw/stand/reload/open 2; melee/parley/care/assist/interact 3; ranged 4; guard 2; end 0
Attack / defense	Body/transversal or ballistics vs Defense / Body/fieldcraft vs Attack DC
Damage	floor(base x wear), optional +2 strong, subtract armor max 5; minimum 0
Wear	Weapon -2/attempt; tool -1/use. Factor 1 at 60+, .8 at 30-59, .55 below 30 while operable
Morale	First half-Health/protector/objective trigger: d20 > morale withdraws; nat1 holds, nat20 withdraws

World / encounter	Rule
Cycle	E -3, thirst +4, hunger +2, sleep +3; need 90+ costs 4 HP each; ailment 1 HP
Watch	Four shared cycles; encounter d6 trigger 1 quiet / 1-2 exposed / 1-3 disrupted
Group	Choose habitat d12, budget gate, 2d6 variant, d3 desired count, 2d6 disposition, d6 need
Variant	2-4 depleted / 5-9 typical / 10-12 reinforced; budget fallback is recorded
Budgets	Normal 2/3/4/6/7/9 for 1-6 PCs; two independent combat NPCs add 1 before scaling
Progress	Normally 1 XP per meaningful resolved situation; 3/session +1 goal. Paid contract IDs never repeat
